WCP ENVELOPE
A DIVISION OF WCP SOLUTIONS
• Please follow the exact die lines. It is important to keep the scale at 100%.
• It is essential that the grain run in the direction specified.
• The position of the envelope is critical to insure proper breakout in the die cutting process.
• Minor variations may occur in the die cutting and folding process. For best results, follow our layout.
• Envelope machines cannot fold perfect borders or bleeds. Designs with bleeds must wrap 1/8" around to back.
• This envelope may not be suitable for solid coverage envelopes where the ink extends beyond the cut lines. If you are running a full flood, please add gripper and color bar dimensions to the sheet size.
• Please mark your guide and gripper. Make sure that the stock is jogged.
• Knockout areas must be free of inks and varnishes otherwise glue, or gum may fail. Please call if you require a special layout for knockouts.
Thank you.
